Computer Methods in Applied Mechanics and Engineering 103 (1993) 447–448
North-Holland

Cumulative contents of Volume 103

Volume 103, Nos. 1–2, March 1993

Dedication 1

Introduction 3

Large rotations revisited, application of Lie algebra [CMA 391]
J. Argyris and V.F. Poterasu 11

Optimization of composite, stiffened, imperfect panels under combined loads for service in the postbuckling regime [CMA 390]
D. Bushnell 43

Kinematic and dynamic analysis of mechanisms with cams [CMA 399]
A. Cardona and M. Géradin 115

'Best' transverse shearing and stretching shell theory for nonlinear finite element simulations [CMA 394]
W.B. Krätzig 135

Applications of the singular value decomposition in dynamics [CMA 384]
J.P. Meijaard 161

Reduced basis technique for nonlinear vibration analysis of composite panels [CMA 388]
A.K. Noor, C.M. Andersen and J.M. Peters 175

High-order Taylor–Galerkin and adaptive *h-p* methods for second-order hyperbolic systems: Application to elastodynamics [CMA 396]
A. Safjan and J.T. Oden 187

The use of computers in the design of discrete component systems [CMA 395]
A.L. Schwab and K. van der Werff 231

Modeling and computation of shakedown problems for nonlinear hardening materials [CMA 389]
E. Stein, G. Zhang and Y. Huang 247

Necking in tensile bars with rectangular cross-section [CMA 382]
V. Tvergaard 273

Analysis of the inverse Swift effect using a rate-sensitive polycrystal model [CMA 393]
E. van der Giessen and K.W. Neale 291

Nonlinear thin shell analysis using a curved triangular element [CMA 377]
F. van Keulen, A. Bout and L.J. Ernst 315

Instructions to authors 335

Volume 103, No. 3, March 1993

A generalisation of J_2-flow theory for polar continua [CMA 320]
R. de Borst 347

An economical algorithm for the Lagrangian prediction of particle suspension motion [CMA 323]
A.J. Parry, N.H. Woolley and Y.D. Tridimas 363

The linear isoparametric triangular element: Theory and application [CMA 317]
D. Talaslidis and G.A. Wempner 375

New application of hypersingular equations in the boundary element method [CMA 319]
R. Białecki, R. Dallner and G. Kuhn 399

A finite element model for the simulation of the torsion and torsion–tension tests [CMA 327]
A. Moal, E. Massoni and J.-L. Chenot 417

Announcement 435
